I ~~do not~~ ^{do} recommend compliance with his application to be allowed to capitalize a portion of his pension, and his age for this purpose should be taken at 60 years ~~i.e., years, more than the actual age (i.e., his age next birthday).~~

I have found upon the applicant marks corresponding with the identification marks described in the application for commutation of pension

Reasons for (a) Non-compliance of application

(b) Recommendation of increase in years above actual age.
